Seriously? Objects flying all over the place, which is sad for a "precise" automation game, late c64 graphics.

Stay away. Bless the great GabeN for revised refund policy. Pretty much first time I wanted a refund, and it went smoothly.. Love this game, just wish they went a little further with it..

/ () . Cheap little game about shooting asteroids and swarms of some space police patrol cars and space tanks.. Very simplistic shooter/platformer with colorful graphics. Not too bad.

The game will probably appeal to little kids under 8.. Its a short but a beautiful and calm game. It has some secrets here and there but they are NOT achievement secrets and i find that a bit nice. (Dont read this part for spoilers if you want) There is a secret on the first level.

A serene amble through a bizarre world. Worth a few hours exploring and collecting. The ways in which you interact with the world are not particularly deep, but the game is satisfying nonetheless.. wait and get it on a sale.. Broken on Windows 10. Menu displays as white washed and unintelligible. Same with the gameplay when you fumble through to it. Judging by community discussion: even those who manage to modify the game into functioning at all will only experience further BS down the line. Waste of money. Pity - because it looks like a really cool game.. I like the sale currently for the Galaxy Edition, but one thing I'd like to know is where do I find the extra content that has been added? For example the books and the poster, how do I get those?. A very good twist on clicker/idle genre. Very creative. Makes me want to keep going. Less repetitive. Lots of decisions to make, sometimes I agonise over how I should spend my money (they call it souls). The costume bit is fun :D

Cracked me up when I saw some of the enemies... You'll see :) politically incorrect, but hey it's just for fun. Plus lots of references to movies and the rest of our pop culture.

I can't think of much improvements for this lovely gem. It's a good fun game, much less on the repetitive clicking.

Your finger would develop a tiny brain after playing this much smarter clicker game.. Star Ruler is an amazing 4X game with lots of customisability. Its noted for allowing the player to produce massive space stations, battle ships that span entire galaxies, and tools to destroy whole planetary populations, or even the whole planet. Its not the best looking game, has AI and micro management problems.. but its definently the most fun game of its type in my opinion. But that's coming from someone who doesn't really like this genre, but enjoys blowing up planets and making space stations that are bigger than stars.

This is worth a few hours of play time for anyone who likes big tech trees, big economy, and massive construction projects.. I love this soundtrack. I am so glad I purchased the pack for this game. This soundtrack is amazing!. This is by far the worst rip off of spore. first of all you cant even customize the cell. and theres only two game modes. In the first game mode all you do is eat allergy and those green gas creatures, thats it. you can never stop moving all you can do is turn left or right and boost. in the second game mode called Evolution, you literly load in surrounded by enimies, and die within 5sec.

not to mention this game was supposed to be relieced on the 13th of Oct. however it got posponed twice with no explanation. and they expect us to pay for this garbage.

You cant do anything it shows in the videos, DON'T BY IT.. Really interesting puzzle game.. I adored this game, although it is definitely one to play with a friend or two, as it might be a little boring played on your own. The game is cut into nice little chapters, each taking probably an hour to complete, depending on how many players you have, and how good you are at the challenges.

The puzzles range from fairly easy, to downright nasty, and you may find yourself stuck a few times. The voice over that narrates the story was brilliant, and very entertaining, the voice acting was likewise very good. Each character in this story has their own personality and uniqueness, no two are the same! It makes for a very enjoyable, funny, and interesting game, and overall I would say this is a little gem. It looks childish on the surface, but I very much enjoyed it and think others would too!
